Subject: Doc Unit support?

Want any help “down” there? I am pretty committed here through the end of the FY, although if Irma is a catastrophe, I suppose Regional priorities could change. I’m in the “Response Support Corps” here. I’ve been telling the R8 emergency management people that I am available after October 9 or after for 2 weeks or possibly a little more. There is currently a call out for “community liaisons” for haz waste pick up outreach, and “staging site support” for haz waste collection. I’ve said I’m available for that, but my records skills are more unique. Let me know if you think I could be useful.

Not to relevant, but I actually took the EPA Planning Section Chief training. I’ve never seen any EPA doc unit training, I suppose that’s up to ?us? to organize?
